### FUND PERFORMANCE

In Nov, the Fund value increased by c 2.89% MoM. The Fund is down by c.1.79% since inception (31st of October 2012), while focusing primarily on capital preservation.

We advocate the quality style of high growth, defensive earnings, high dividend yield and low debt / equity in the mid to large cap part of the market while actively managing beta. We believe macro policy changes, liquidity, commodity prices and growth expectations will remain key drivers of risky asset prices. The Fund is suitable only for investors who fully understand and can bear the risks of such a high risk investment for an indefinite period and who can afford a total loss of their investment.
